Features

- 12.1" SVGA high brightness color TFT LCD
- IP65-rating whole system water/dust-proof design
- Fanless system with wide operating temperature range of -20°C ~ +55°C
- Sunlight readable design: low-reflective T/S
- Suspension and VESA mounting

Introduction

The GOT-812 is specially designed for heavy-duty & outdoor applications. Its IP65-rating stainless steel housing protects entire system from outside damage of water, powder and dust. It also outfits sunlight readable technology and wide operating temperature range of -20°C ~ +55°C. Thus, this robust unit is best suited for outdoor environments in extreme sunny or rainy day, dusty or wet spaces in food factories or kitchens and more harsh applications, such as steel factories, transformer stations and vessels.

IP65-sealed system

The GOT-812 adopts a water/dust-proof housing design and six IP65-rating connectors. It passes entire system IP65 test by SGS and verified salt mist test and marine grade by IEC60945.

Sunlight readable design

Its sunlight readable technology with high brightness 800 nits color display and low reflective touchscreen allows the screen legible even under strong sunlight.

Wide temp. (-20°C ~ +55°C) & anti-vibration (2G) design

The GOT-812 supports wide temperature of -20°C ~ +55°C. Besides, the patent of anti-vibration for HDD ensures system reliability and stability.
