Introduction

The ICS-480V is a 14-slot 4U Rackmount Workstation with an 8.4" LCD display and a front panel function & data-entry keypad. This workstation is a fully-functional and cost-effective Industrial Automation Controller. The ICS-480V is available with several backplane combinations and power supplies, which can be applied to versatile applications. The built-in VGA A/D board ensures that the system is compatible with a variety of Single Board Computers from most vendors. The front panel OSD controller allows users to move the LCD into the

best position for any environment. To enhance the system for easy maintenance and upgrade, two USB ports, 12 function keypad & 65 data-entry keypad have been built-in to the front panel. The air filter is located on the external top-cover, which minimizes the system down time for air filter replacement. This ideal industrial-grade workstation can be applied to various industrial projects, such as transportation, factory automation, environmental surveillance, and more.
